

## *A Breeder's Prospective:*

Sheila, a breeder of Chihuahuas, had a female who, after a difficult delivery, failed to come into heat. Just 2 weeks after she gave Lucy Auum Pets Omega 3, she came into heat and later gave birth to 3 puppies. (Lucy's 3 previous litters had been only 2 puppies.) Subsequently Lucy has birthed healthy litters of 3 puppies twice, and had a litter of 5 healthy puppies .

Sheila observes: As a breeder of teacup Chihuahuas, I noticed the difference immediately upon supplementing my females with Auum Pets. Not only were the moms healthier, they also had larger litters and healthier pups. As soon as the pups are eating food, I start giving them Auum Omega 3. Their coats shine with health and vitality. Mom, does not look as if she's had 4 pups after just 4 weeks. She is not gaunt, or thin, and her coat stays bright and shiny and healthy ... all so healthy and frisky, I am delighted with the product and will continue to use it and recommend it to others, because of the spectacular results I have seen in the health of my dogs".

*Don't get caught  
using the  
wrong omegas!*

*Try Mammalian omegas  
You will  
see the difference!*

*Auum products do not contain fish oil*

## Omega 3

*It just makes sense ...  
Omegas structured naturally  
the way nature designed for mammals.  
From the leader in balanced mammalian omega supplements for humans.*

## Auum Pets ... not like the others?

Most omega 3 supplements are from fish or plant sources. Fish and plant omegas are not structured in a way that properly supports the diet of a mammal. Also, because dog food often contains ingredients that are high in omega 6, it is important to supplement with a high quality omega 3 to balance these omegas. High omega 6 levels increase inflammatory response, which left unbalanced can lead to disease. Omega 3s decrease inflammation.

### The ideal omega 3 + supplement for both dogs and cats

- **Mammalian Omega 3 - EPA, DHA and DPA**
- **Added D3, vitamin A (beta carotene and retinal palmitate) and vitamin E**
- **DPA is the important omega that is missing in plant and fish oils**
- **Omega 6 : Omega 3 is in a 1:1 ratio**
- **The natural configuration of mammalian omegas makes for quick assimilation and results, unlike fish omegas**

#### For all life stages Dosage for Dogs and Cats:

0 to 10 kg ..... 2.5 ml/day  
 10 to 20 kg ..... 5.0 cc/day  
 Over 20 kg ..... 10 cc/ day

#### Active Ingredients

Each 2.5 ml serving contains:

Seal Oil (DPA, EPA, DHA) ..... 2.5 ml  
 Vitamin A Palmitate ..... 481mcg  
 Beta Carotene ..... 225 mcg  
 Vitamin E ..... 21 mg  
 Vitamin D3 ..... 3.13 mcg

## A Veterinarian's Prospective

Dr. Dadson has over 30 years of experience in his own veterinarian clinic.

Using AuumPets, Dr. Dadson observes:

- Increased mobility, specifically in aged dogs, allowing less or no use of anti inflammatories and chondro protectives
- Better response to normal therapeutics used in generalized skin infections and allergies
- Improved cognitive functioning and a "happier" pet
- Better skin and coats in kennels using it regularly, as well as more robust and vigorous litters
- Bitches are more capable of maintaining a healthy hair coat and body condition while raising their litters
- Generally a calmer pet with fewer obsessive/compulsive behaviour disorders

"I have found that using mammalian omega 3 has brought about more of the desired clinical changes expected from an omega 3, more consistently than the previously used fish oils. In fact the improvement in the mobility for aged dogs is so impressive that AuumPets has become my "go to" product considered when handling a geriatric case with mobility issues."

## Dr. Dadson's Summary

Mobility	Skin Issues	Kennel Care
✓ Better Mobility	✓ Enhanced response to skin therapeutics	✓ Increased fertility
✓ Less pain and inflammation	✓ Less scratching and itchiness	✓ Larger puppies with better growth rates
✓ Increased energy	✓ Lustrous coat	✓ Females retain healthy coats and vitality through gestation and nursing even large litters
✓ Healthier immune system	✓ Less dry skin issues
